

Strong Safety Profile

Why is Elasense Safe?

Elasense was designed using the safest ingredients that are backed by science. The ingredients in the Elasense line were all hand-picked by a renowned dermatologist, an expert in Immunodermatology. We use natural ingredients where possible, and chose ingredients known for safety and efficacy.

Elasense products are:

SAFE:

- Dermatologist developed.
- Hypoallergenic.
- Nonirritant.
- Ingredients are chosen for their strong safety profile.
- We use the highest testing standards in the industry to ensure that the products you receive have been produced with our strong quality standards.
- Hygienic self-dosing airless pump makes dispensing clean and easy, lessening the chance of contamination

CRUELTY FREE:

- We test on humans, not animals.

GREEN:

- All of our components and packaging are made with recyclable materials.

NATURALLY INSPIRED:

- We do not use artificial colors, fragrances, parabens, or waxes.

PROVEN:

- All products have been tested under the control of a dermatologist.
- Formulations are based on hard science - not trends.
- Key ingredients are in the formulations because they work - not because it sounds good to put it on the label.
- Results. [Testimonials](#) from product testers show improved overall skin tone, softer, and brighter looking skin.

Safety Profile

The ingredients have strong safety profiles, and rate low on the Environmental Working Group's ([EWG.org](#)) ingredient rating scale, which many in the industry use to reference the safety of ingredients used in cosmetics and skin care products.

Elasense products contain:

The "No No list"

- | | | |
|------------------------|-------------------|----------------|
| ✓ NO parabens | ✓ NO paba | ✓ NO petroleum |
| ✓ NO mineral oil | ✓ NO waxes | ✓ NO tars |
| ✓ NO synthetic colors | ✓ NO formaldehyde | ✓ NO talc |
| ✓ NO fragrance | ✓ NO acetone | |
| ✓ NO artificial colors | ✓ NO dyes | |

Elasense does not use ingredients consumers and experts in the field are concerned about such as Benzophenone, Coal Tar, Fragrance, Parabens, PEG (Polyethylene Glycol), Propylene Glycol, Sodium Lauryl Sulfate, Synthetic Colors – FD&C and D&C, TEA (Triethanolamine), Triclosan.

In addition, we've taken it a step further, making sure to avoid questionable ingredients like Avobenzone, Citral, Citronellol, Cyclomethicone – Silicone Derived, Dimethicone Copolyol – Silicone Derived, Dioxin, Methoxycinnamate – Chemical Sunscreen, Formaldehyde, Geraniol, Hydroquinone – Fade Creams, Limonene, Linalool, MEA (Monoethanolamine), Mineral Oil PABA – Chemical Sunscreen, Petroleum, Phthalates, PVP/VA Copolymer, Retinyl Acetate, Retinyl Palmitate, Talc.
